30 new products for our 30 years!

"30 new products for our 30 years" is the motto that sums up the special event organized to celebrate the 30-year anniversary of Lika Electronic. 30 years of excellence and innovation.

"It is such an honour and a privilege to celebrate today the 30th anniversary of the company"

Lika Electronic was founded in 1982 in Schio (VI), Italy employing a small and passionate team to manufacture absolute encoders for the German market.
Lika Electronic started as a family-owned business. But thanks to its technical competencies and comprehensive know-how in the automation industry along with the high quality standards and the skill in providing solutions that target specific customer needs, over the years Lika Electronic has grown becoming a forward thinking innovative and global company.
Now Lika is among the leading manufacturers of optical encoders and magnetic measurement systems in Europe and worldwide.

"It is such an honour and a privilege to celebrate today the 30th anniversary of the company -says Marco Calabrese, Co-Executive Director of Lika Electronic-.
We are excited and very proud of the work we have done in these three decades.
This gives us a great impetus to continue remaining committed to our spirit of innovation and development, looking to the future with the enthusiasm that steers us towards new opportunities".

To mark this significant milestone in the company's history Lika Electronic is planning, among the others, the special event called **"30@30"**.
"It is fundamental to a technology brand to demonstrate progress through continuous improvements -declares Marco Calabrese-.
For this reason we have redoubled our efforts today at Lika. We are in the process of introducing in the marketplace 30 new products and innovations throughout the year.
Some solutions are ready now; some others are on the finishing stretch and are being tested in our laboratories in this moment; few others are under development and will be available within the end of the year. I believe this is what our customers expect from us.
They are really coming to celebrate our first passionate 30 years!".

We are in the process of introducing in the marketplace 30 new products and innovations throughout the year.

Read here our monthly newsletter!

30@30!

January	**1** **RD1A** Positioning unit
	2 **SFP** Draw wire potentiometer, 2000 mm
Feb	**3** **SFE** Draw wire encoder, 2000 mm
	4 **XAC** Profibus/CAN Heavy-duty
	5 **SMEx2** Magnetic sensor with limit switch
March	**6** **M12** M12 connections
	7 **CK41** Blind hollow shaft encoder
	8 **ASx36** Single turn, hi-res ø 36 mm
April	**9** **RD12A** Positioning units with motor brake
	10 **LD300** Display for incremental encoder
	11 Modbus interface for positioning units
May	**12** **LD250** Display for SSI encoders
	13 **IF20** Signal converter TTL > HTL
	14 **C100** Heavy-duty with terminal block
June	**15** **HM58 P** New absolute program. encoder
	16 **SFA** Draw wire support for absolute encoder
	17 **CB61** Gearless lift motor encoder
July	**18** **EM58 A** Analogue programmable encoder
	19 **IF10** Splitter for incremental encoders
August	**20** **IF51** Conversion interface SSI > analogue
	21 **IF52** Conversion interface SSI > Parallel
	22 **Ax58 A** New version of analogue encoder
Sept	**23** **IF50** Conversion interface INC > analogue
	24 **IP58x** Programmable incremental encoder
October	**25** **IF30** Sin/cos interpolator
	26 Modbus output for absolute encoders
Nov	**27** **IF60** Fiber optic transm/receiver for encoder
	28 **I58K** Stainless steel version
	29 **AMx36** Multi turn ø 36 hi-res
Dec	**30** **SMRA+MRA** Absolute magnetic ring
